

Extra Notes

Some things to note...

20210620 Slackware's CPU frequency scaling works (checkout `rc.cpufreq`) - just to remind myself, no need to look into this!

Admin-stuff for non-root user

To allow non-root users basic admin (poweroff, reboot, etc.), add them to power group and insert the following to sudoers.

```
%power ALL=(ALL) NOPASSWD:/sbin/poweroff
%power ALL=(ALL) NOPASSWD:/sbin/reboot
%power ALL=(ALL) NOPASSWD:/usr/sbin/pm-suspend
%power ALL=(ALL) NOPASSWD:/usr/sbin/pm-hibernate
%power ALL=(ALL) NOPASSWD:/usr/sbin/pm-powersave
```

Note: The `pm-*` binaries (`pm-utils`) are no longer available on Slackware 15.0

Note20250112: use `loginctl` on Slackware 15.0 - no need to add sudoers

Multicast DNS @ Zeroconf

- install `nss-mdns` (requires `avahi`, which requires `libdaemon`)
- save nss config (in etc)
 - `mv nsswitch.conf nsswitch.conf-orig`
- use provided nss config
 - `cp nsswitch.conf-mdns nsswitch.conf`
- run daemon at startup `rc.avahidaemon` and `rc.avahidnsconfd`

Note20260720: latest install seems to NOT need to `switch@edit nssswitch.conf`
